

Problem

Given an array of n integers $x_1, x_2, \dots, x_n$, our task is to find the maximum sub array sum, i.e., For example, in the array $[-1, 2, 4, -3, 5, 2, -5, 2]$ the following subarray produces the maximum sum 10: $[-1, 2, 4, -3, 5, 2, -5, 2]$

Input Format

Two line input First line should read an integer value which represents size of array Second line consists list of elements(integers) separated by space

Constraints

1

Output Format

It prints integer value which represents maximum sub array sum

Sample Input 0

8
-1 2 4 -3 5 2 -5 2

Sample Output 0

10

Sample Input 1

7
-3 4 -1 2 1 -4 3

Sample Output 1

6

Sample Input 2

8
-1 2 4 -3 5 2 -5 2

Sample Output 2

10

Sample Input 3

6
-1 2 3 4 5 -15

Sample Output 3
